

STEREO MOC Status Report  
Time Period: 2012:072 - 2012:078

STEREO Ahead (STA) Status:

1. The following Ground System anomalies occurred during this reporting period:
  - On day 073, during the DSS-55 support, turbo decoder lock was lost at 0712z due to an antenna pointing anomaly. This anomaly resulted in the loss of one frame of SECCHI SSR data. See DR# N107963 for more information.
2. The following spacecraft/instrument events occurred during this week:
  - The average daily SSR playback volume for Ahead was 4.9 Gbits during this week.

STEREO Behind (STB) Status:

1. The following Ground System anomalies occurred during this reporting period:
  - On day 074, during the DSS-65 support, turbo decoder lock was lost briefly at 1058z. This anomaly resulted in the loss of 174 frames of SECCHI SSR data. See DR# N107981 for more information.
  - On day 075, during the DSS-24 support, no monitor data was received for the duration of the support due to an SFG configuration anomaly. All SSR data was recovered. See DR# N107979 for more information.
  - On day 077, during the DSS-65 support, turbo decoder lock was lost briefly at 1809z. This anomaly resulted in the loss of one frame of SSR data. A DR has been requested.
2. The following spacecraft/instrument events occurred during this week:
  - The average daily SSR playback volume for Behind was 4.8 Gbits during this week.
