

STEREO MOC Status Report  
Time Period: 2019:280 - 2019:286

STEREO Ahead (STA) Status:

1. The following Ground System anomalies/events occurred during this reporting period:

- On day 282, a DSS-84 (ESA MLG) SLE V4 Bind and Dataflow test track was conducted successfully to verify SLE V4 Bind configurations, telemetry and command operations with ESA. SLE telemetry bind operations were delayed by 20 minutes due to a configuration issue with the SLE telemetry server at DSN. See DR #N111255 for more information.

2. The following spacecraft/instrument events occurred during this week. The Ahead observatory operated nominally during this week.

- The average daily science data return for Ahead was 5.8 Gbits during this week.
