

Table of Contents

A. IMPACT Investigation Instrument Summary-Phase A Status.....	1
B. Science Goals of the IMPACT Investigation.....	3
B.1 Reconstructing 3D Pictures of CMEs	6
B.2 The 3D Corona Relationship to Solar Wind Structure.....	9
B.3 SEP Acceleration and Propagation	10
B.4 The Solar Origins of Geoeffectiveness	14
B.5 The Solar Magnetic Cycle	15
B.6 Complementary Science Objectives	16
B.7 Space Weather Applications	17
B.8 Relationships to Other Missions and Ground-Based Observations	17
B.9 References	19
C. IMPACT Instrumentation	22
C.1 System Design	22
C.1.1 Design Overview	22
C.1.2 IMPACT Resource Requirements	24
C.1.3 Instrument Suite Development and Integration	25
C.1.4 Changes from the Proposed IMPACT Instrumentation.....	26
C.2 IMPACT Boom Suite	28
C.2.1 Magnetic Field Experiment (MAG)	29
C.2.2 Solar Wind Electron Analyzer (SWEA).....	32
C.2.3 Suprathermal Electron Detector (STE).....	34
C.2.4 IMPACT Boom	37
C.3 Solar Energetic Particles (SEP) Subsystem	40
C.3.1 Suprathermal Ion Telescope (SIT)	44
C.3.2 Solar Electron and Proton Telescope (SEPT).....	49
C.3.3 Low Energy Telescope (LET)	58
C.3.4 High Energy Telescope (HET).....	65
C.3.5 SEP Common Electronics	71
C.4 IMPACT IDPU	76
C.4.1 System Description.....	76
C.4.2 Development Plan	77
C.4.3 Management Process	78
C.5 Mission Operations Support	80
C.5.1 Operational Constraints	80
C.5.2 Mission Operations Plan.....	80
C.5.3 Uplink Data Volume.....	80
C.5.4 Data Processing, Validation, Analysis and Archiving.....	80
D. Management and Schedule	83
D.1 Team Organization	83
D.2 Management Process	87
D.3 Risk Management	88
D.4 Project Schedule	89
D.5 ITAR-Related Issues and Plans	90
D.6 IMPACT Concerns	90
D.7 Education/Public Outreach	90

Appendices

- A. IMPACT Interface Requirements
for the Spacecraft
- B. Performance Assurance Implementation Plan
- C. Contamination Control Plan
- D. Configuration Management Plan
- E. Safety Plan
- F. SEP Cost Savings Options
- G. IMPACT Development Responsibilities
- H. Design, Construction, and Test of Magnetically Clean Spacecraft
- I. DPU PLASTIC Processor Tasks
