The figure displays a complex spectrogram and time-series plot of radio frequency activity over a 24-hour period. The top section shows time-series data for various channels (LFR A, LFR B, LFR C, HFR 1, HFR 2, TDS, TDSmax, APM_Ey) with a color scale from -1 to 85. The bottom section is a large spectrogram with frequency on the y-axis (2.5kHz to 10MHz) and time on the x-axis (0:00 to 24:00). A color bar on the right indicates power in dB from 2 to 24. A vertical color bar on the left indicates time of day from 0:00 to 24:00.
