STEREO MOC Status Report Time Period: 2007:330 - 2007:336

STEREO Ahead (STA) Status:

- 1. The following Ground System anomalies occurred during this reporting period:
 - None.
- 2. Ahead spacecraft performance continues to be very good with all subsystems performing nominally. IMU 2 continues to be used nominally on the Ahead spacecraft. The following list summarizes the spacecraft/instrument events which occurred during this week:
 - The average daily SSR playback volume for Ahead was 7.3 Gbits during this week.
 - On day 330, SECCHI successfully loaded Flight Software patch 5.07.
 - On day 333, recent new macros in RAM were loaded to EEPROM.

STEREO Behind (STB) Status:

- 1. The following Ground System anomalies occurred during this reporting period:
 - None.
- 2. Behind spacecraft performance continues to be very good with all subsystems performing nominally. The following list summarizes the spacecraft/instrument events which occurred during this week:
 - The average daily SSR playback volume for Behind was 7.0 Gbits during this week.
 - On day 330, SECCHI successfully loaded Flight Software patch 5.07.
 - On day 332, the 6th momentum dump on the Behind spacecraft was successfully completed.
 - On day 332, recent new macros in RAM were loaded to EEPROM.
